

# Vishal Singhal

## *Sr. Software Engineer*

✉ [vishal.singhal21st@gmail.com](mailto:vishal.singhal21st@gmail.com)

**Tapchief** *June 2019 - Present*

Senior Software Engineer

TapChief empowers over 60000+ professionals to aggregate their personal brand online, interact and learn from top professionals and work with businesses on consultations & projects. As a senior product engineer, I lead the development of ATS-Admin (Applicant Tracking system) for our Operations Team. It helps Tapchief in managing applications and projects posted on our platform. We use Angular 6, Python Django for building our products.

**Weinvest** *Aug 2016 - May 2019*

Senior Software Engineer

Weinvest is a Fintech Startup headquartered in Singapore with its development centre in Bangalore. As a core team member and UI Team Lead, I got the opportunity to build the initial products of the company. During my Stint in Weinvest I got the opportunity to build Grow Wealth (Robo Advisory Platform), Advise wealth (RM assisted Advisory), Start Wealth (Strategy Marketplace) using React, Vue js and Ruby on Rails.

**Pipecast** *Oct 2015 - Aug 2016*

Co-founder

Pipecast is a Video Streaming and Video Creators Networking Platform with two platforms - Pipecast Stream [<http://pipecast.in>] and Pipecast Colab [<http://colab.pipecast.in>]. I, as Cofounder of Pipecast, developed the Front End for both the platforms in Angular js.

**Eltropy Inc** *May 2015 - Oct 2015*

UI Developer

Eltropy is a Silicon Valley Startup with its development centre in Bangalore, providing smart solutions for B2B collateral. I worked as a Web Developer on feature building and enhancements, and was also instrumental in porting the legacy knockout.js code to Angular js.

## **Bang The Table** *Aug 2014 - Apr 2015*

UI Developer

Bang the table is an Australian Startup providing community engagement solutions to local government and companies. As a Web Developer I worked closely with the product team to implement new features while constantly enhancing the existing ones.

## **Tech Mahindra** *Jun 2012 - Aug 2014*

Software Developer

I started my career with Tech Mahindra as a Software developer. While in Tech Mahindra, I worked on a Release Automation Tool - NOLIO. I provided support to a client Tesco's Devops cell to look after the release automation and trained its team on the said automation tool.

# QUALIFICATION

**Bachelor of Engineering in Information Technology** *August 2007 - June 2011*
